

ACETAMINOPHEN (TYLENOL)

TIPS FOR PARENTS

talk with the doctor before treating with acetaminophen

parents have anxiety when their child feels unwell or spikes a fever, don't panic

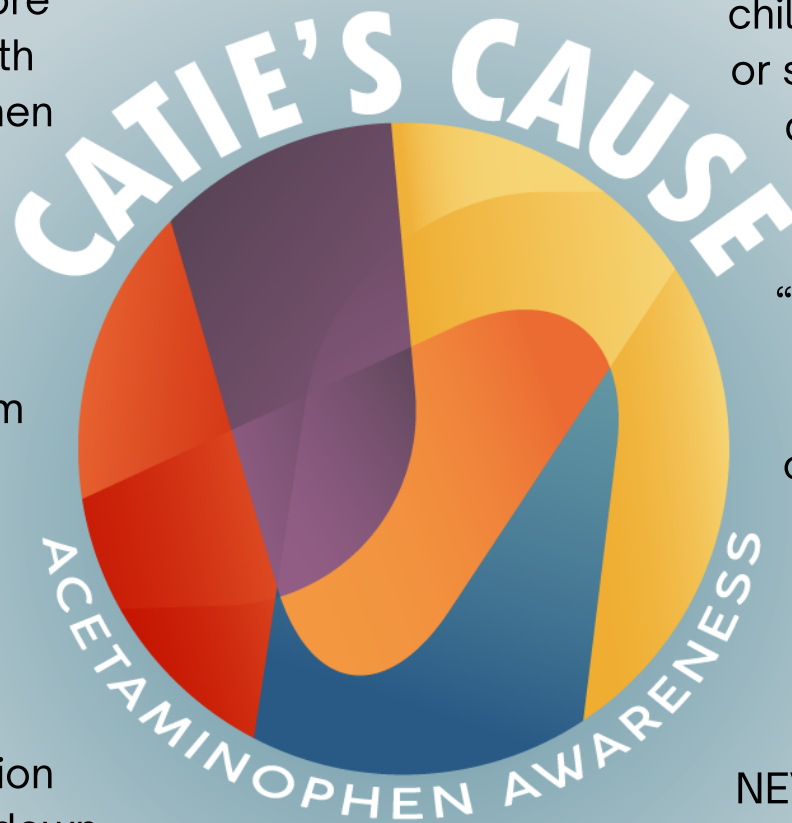

write down instructions from the doctor to refer to later

be aware of "hidden" sources of acetaminophen check the labels of all meds to avoid a double dose

keep a medication tracker and write down dosage and time administered

NEVER use adult OTC meds for kids, concentrations differ

Talk with your pediatrician during well-child visits about "what if's" related to OTC Meds
